WELAND
SOLUTIONS

RAISING YOU TO THE RIGHT LEVEL

It has been our aim to hold a leading position since we set up in business in 1999. We have therefore worked proactively to create innovative and high-performance solutions that last for generations. With extensive expertise and understanding of customer needs and wishes, we serve you long after the project has been completed. You can expect commitment and dedication from us as your long-term business partner.

We raise your business. You decide to which level.

WELAND
SOLUTIONS

PICKING AIDS

Discover faster and easier picking with efficient order picking equipment that helps optimise work processes. The products can be combined to create an optimal warehouse solution to suit your specific needs.

LIGHT POINTER

The light pointer is an effective picking aid when the load trays have many small compartments. Illuminates the correct picking location with a solid, green light. Light beam approx. 50 mm

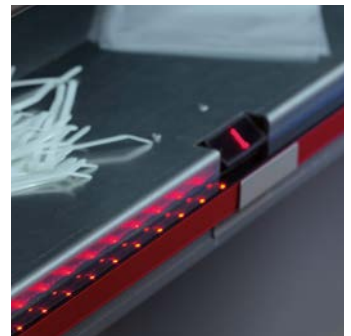

PICKING DISPLAY

A user-friendly monitor provides the operator with order information and an easy-to-understand image of the load tray. Colour marking indicates the position in the current compartment from where the material is to be picked. An arrow on the monitor indicates incoming or outgoing deliveries, which enables work without any risk of incorrect picking. The software is controlled via Compact Talk, with information from the WMS or ERP system.

LED STRIP

The LED strip is an efficient picking aid without moving parts, suitable for load trays with compartments. Light emitting diodes show from where on the load tray the operator must pick goods. A depth indicator shows on a digital display the depth in the compartment from which the picking is to be done. The vertical storage lift has to be connected via Compact Talk to a WMS or ERP system.

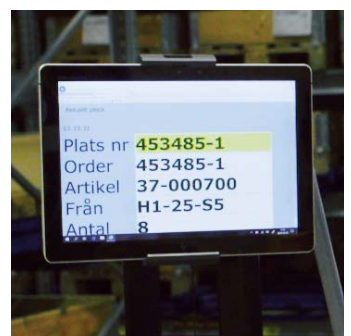

PICK/PUT TO LIGHT

An efficient solution for batch-picking when the operator has to pick an item that is included in multiple customer orders. Put to Light is an aid for the operator that indicates in which customer order an article has to be placed once it has been picked from the vertical storage lift. With the help of LED displays, the operator is given information on how to allocate the picked articles between the various customer orders.

PUT TO SCREEN

A display behind the operator's boxes shows where to place the item, which order it belongs to, which item, what quantity. This fully dynamic system allows the operator to choose whether to start one or several orders, and what size box to pick to.

ACCESSORIES

Weland Solutions offers a wide range of picking aids, accessories and fittings for our vertical storage lifts, all designed to make your warehouse management processes as seamless and efficient as possible. We offer everything from scanners and trolleys to cartons and collision protection.

SCANNER

A scanner increases the reliability of the picking operation and is used to acknowledge items, storage locations and orders. Scanner reading requires control by the WMS or ERP system. Available as a hand-scanner and a ring/finger scanner.

ACKNOWLEDGEMENT

Make the workplace more effective with smart solutions for acknowledgement. Save time and effort by using automatic, wireless or hands-free acknowledgement of picking.

The acknowledgement list sits under the operating opening and makes it possible to acknowledge the pick at any point along the entire width of the vertical storage lift.

TROLLEY

Trolley for when it is necessary for whole trays to be removed and "borrowed" from the vertical storage lift. Among other things, the trolley is suitable where preassembled parts for a final assembly lie on a tray that has to be run to the final assembly. The trolley is also suitable when service and replacement kits are on the tray, which is run to the machine/plant to be repaired.

LABEL PRINTER

The label printer is used to print order labels, item labels and storage location labels. Label printing requires control by the WMS or ERP system.

PC KIT

A practical stand on which to hang a printer, monitor and keyboard to facilitate the picking process and contributes to a more ergonomic posture.

COLLISION PROTECTION

Robust collision protection that protect vertical storage lifts, walls and work spaces from collisions with forklifts. The collision protection is manufactured with a sigma beam base, a support beam with low weight and high strength. The protection is anchored to the surface or the ground and is built up with the components' support, end and corner. The modular design dimensions make it simple to build the collision protection to suit your needs.

CYCLE ROLLER SHUTTER

A cycle roller shutter screens off the operating opening and keeps the vertical storage lift free from dust, reduces the noise level and also acts as protection against theft.

FITTINGS

Simplify warehouse management processes and make maximum use of space with our range of fittings. Weland Solutions offers smart solutions that help you streamline and structure your processes and make it simpler to find what you're looking for.

SHEET METAL FITTINGS

Durable fittings made of galvanised sheet metal that is perfect for industrial settings as the material is able to withstand contact with grease and oil. With metal fittings, the vertical storage lift is a fireproof storage site.

BOXES

Light and versatile boxes in corrugated cardboard, ideally suited for picking small items. The boxes are available in many different sizes to suit most storage needs.

MOULDED FITTINGS

Vacuum moulded plastic suitable for small articles (screws, nuts, springs etc.) and it is ergonomic (soft corners, easy to pick from). It is made from hardwearing plastic that is either made in standard version or customised.

EURO CONTAINERS

The design of the container ensures stability during transit. The straight sides and modular sizes simplify stacking and storing. The solid containers come with a solid, smooth base as standard. Withstand temperatures between -30° and +70°C.

PLASTIC BINS

Designed for various warehouse and paternoster systems, where high demands are placed on a bin with a large internal volume. Transparent dividing walls with a label holder are available as accessories. The bin has a label space for self-adhesive labels on the front and rear edges.

WELAND BOX

A flexible plastic box specially designed for Weland Solutions' vertical storage lifts. The box is designed for the highest possible filling ratio of load trays which optimises the filling ratio of your storage space. The width and length of the Weland box can be adjusted using dividers and dividing walls to create between 1 and 16 storage compartments per box.

LOAD TRAY MAT

Thin rubber mat that can be rolled out on a load tray to stop items from moving about. The load tray mat is sold in complete rolls only.

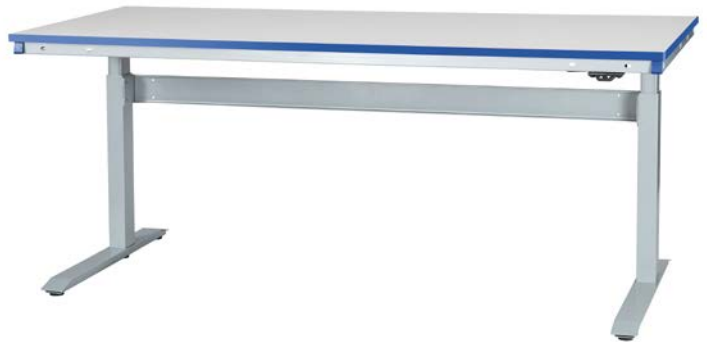

OTHER ITEMS

We know that different businesses have different needs. That's why we offer a wide range of high-quality products for warehouse management and logistics, aimed at facilitating your processes, and providing flexibility and enhanced ergonomics in the workplace. All aimed at making the workday more efficient for you and your team.

WORKBENCHES & ACCESSORIES

We have adjustable height workbenches with different superstructures for workshops, industry, warehouses and packing. The table stand is available in a choice of widths and depths and, together with a large range of table tops and accessories, provides you with a flexible system that facilitates your work processes.

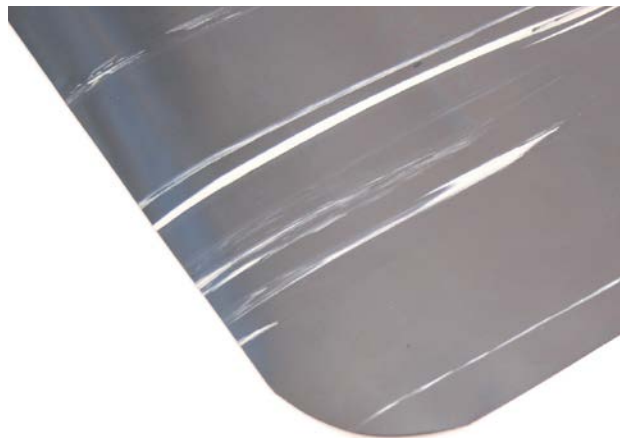

ROLLER AND WORKSHOP TROLLEYS

With us, you can find both roller and workshop trolleys to make your work easier. Whether you need a trolley with a worktop where, at the same time, you can keep your tools or a flexible work surface for packing work. We have storage solutions for both industry and workshops.

ERGO MAT

Plastic workplace mat with spring-back design that enhances health and safety for employees who spend a lot of time on their feet. The mat has a wear surface and closed cells that reduce stress on back and leg muscles. This slip-resistant mat is easy to clean and move. It insulates against heat and cold, and muffles noise. Resistant to oils and chemicals. Can be purchased in lengths or an entire roll.
